SPS High School Mathematics Course Sequence:
for students on a pathway to advanced coursework

For HS students only: Geometry may be taken concurrently with either Algebra 1 OR Algebra 2 in order for students to access advanced coursework by 12th grade.

*Senior only course – no HS math course to follow

♦ Graduation Pathway Course: passing the course with a C+ or higher fulfills the math component of the graduation requirements.

Note: All courses beyond Geometry can count towards a third-year math course to fulfill the graduation requirement. There are CTE equivalent course options that can be counted as a third-year math credit. Consult with the school counselor for CTE course options that are available at each building. Not all courses are offered at every high school. Contact schools for specific course offerings.
